NUMBER 12

France And Germany Negotiating

BRITAIN'S CAUSE

At the time of writing, no decision has been announced over the request France made to Germany for an honorable peace, and Thursday afternoon the armies were still fighting. Monday morning, when their armies were running short of ammunition and the Nazi hordes kept pressing on, France asked for an honorable peace after the government of Paul Reynaud had resigned and Premier Petain had formed a government. Hitler and Mussolini met to discuss the terms, and then a French committee met to consider the proposals and a decision was expected during Thursday night.

The decision of France was a great shock to the British people and the government, but it in no way unnerved them. We are sure, that like us, every British subject must have been thrilled all over when Prime Minister Churchill in a broadcast said, "We shall fight on to the end, with help if we can, alone if we must." This is the spirit of Britain and every effort is being made to protect her home shores and to give France all possible aid if she decides to carry on the war. The United States has promised all possible assistance in money and materials for Britain's successful carrying on of the war.

WEDDING BELLS

POWELSON — CARD

Bert, P. son of Mr. and Mrs. D. M. Powelson, and Alice, daughter of Mr. and Mrs. S. B. Card both of Raymond, were married in the Alberta Temple on June 6th, with Pres. Edw. J. Wood officiating. Friends and relatives of the two happy young people witnessed the ceremony and extended their best wishes to the contracting parties.

Bert has been assisting his father in the operation of the farm south of town, and Alice has just returned from her years study at the B.Y.U. at Provo, Utah. They are setting up housekeeping in the home beside Mrs. Emma Dahl's, and the Recorder, with their many Raymond and district friends, joins in wishing them a long and happy married life.

FAIRBANKS — WALKER

A wedding of local interest was solemnized at the Cardston Temple on Wednesday with Pres. Edw. J. Wood officiating, when Paul, youngest son of Mr. and Mrs. Geo. A. Fairbanks and Mary, second daughter of Bishop and Mrs. Jas. H. Walker, were united in marriage, the parents and other relatives of both young people being present to witness the ceremony. The happy young couple are away on a honeymoon now and when they return will set up housekeeping in their own home which Paul has been fixing up for the past year, having purchased the Linkous home in the south end of town a year ago or more.

These two young people are well and very favorably known in Raymond, their families being amongst the pioneer settlers of the town just after the turn of the century. Paul is working in the Hardware department of the Raymond Mercantile Co., and Mary has been employed at the office of the Canadian Sugar Factories here for some time. The Recorder joins with the many friends of Mary and Paul in wishing them much joy and happiness in their married life. —Brooks Bulletin.

We are fighting for Democracy,
From God above we ask
To steer us in our rightful cause
To help us in our task.

We have fought before for
liberty,
For freedom, right of speech.
And all the other things of
truth,
That holy Bibles teach.

The world is now a place of
fear,
Unfit for human life,
And we pray thee Lord to help
us,
In this grave time of strife.

Germany may fight for power,
For riches, tracts of land.
But we shall forever fight for
right,
And for true Democracy
stand.

By John MacPhee.

CROP REPORT

Up to date crops all look good and show no definite signs of lack of moisture although a good soaking rain would be greatly appreciated.

First cutting of alfalfa is falling before the knife now, and from patches looked at the first cutting will be a heavy one. Grain fields look lovely and green and pastures are holding up well, although on the high spots they are commencing to show a little bit brown. The grass is nice and long and makes very good feed. Summer fallowing is about finished.

Best thinning is about wound up and the second cultivation is in progress. Beets look good, but will need irrigating as soon as thinning and cultivating is finished unless we get rain.

THERE IS NO SECURITY

The British Prime Minister Winston Churchill told the people some plain, hard truths in an address delivered a few weeks ago. The tendency usually is for public men to cover their utterances with candy, to glaze over realities and to try to please their audiences. But Mr. Churchill presented unpleasant facts in all their rawness.

"We ought not to be afraid of running risks," he said. "Since when have we learned that we are entitled to security in this transitory world of chance and illusion. The only way to avoid risks is never to have lived at all."

We have been calling upon our governments to provide security and it is now becoming plain that, as Mr. Churchill said, there is no security except that provided by willing hands. A clear brain and an indomitable heart.

In order to curry favor and gain votes from the people, political parties promise security. In fact, they will promise anything but it is a fatuous idea that even government can provide security.

A nation must possess the ability to endure adversities with a degree of stoicism, and a willingness to accept discipline in order to be strong. It must teach its people to be faithful and loyal and to banish fear. A nation whose people are thus trained and disciplined will gain a greater degree of security than if the people are led away by false doctrines and flattery. They seek protection from the government, and are divided then in wishing them much joy and happiness in their married life. —Brooks Bulletin.

Are You Decorating For Dominion Day

On Saturday last, Principals J. O. Hickman and L. H. Jacobs made the rounds of the business houses and part of the Town, requesting that decorations for Dominion Day be put up as soon as possible.

The response must have been 100 per cent. for by the middle of the week there were quite a number of decorated windows and several large flags flying along the business street. We know too of a number who tried to get flags to decorate, but were unable to get just what they wanted at that time, but have since

decorated and the windows and shop fronts present a very patriotic appearance now.

It has also been requested that houses be decorated with flags between now and Dominion Day to create a feeling of patriotism and an appreciation of the efforts of the Mother Country to guarantee us peace and freedom. The Recorder is glad to pass on to citizens of Raymond this request in the hope that everyone will co-operate and really dress up the Town for this Dominion Day.

NEWS NOTES

Very little irrigation water is running out of the lower end of the ditches right now. The dry spell is demanding water and lots of it on gardens, lawns and so on.

Speakers at the 2nd Ward Sunday evening were Pres. Heber Allen of the Stake Presidency and Elders Ivan Wilde and Glen Stanford filling a regular home missionary appointment.

Miss Barbara Hill, a missionary of the Canadian mission and her sister, from Utah, spent a few days in Raymond this week renewing acquaintances with local missionaries who had labored in Eastern Canada. Amongst them were Elders Clifford Dahl, Smellie Redd and Ivan Wilde.

We don't know where the compliment should go, but the town has been free of the cow nuisance so far this summer than for some years past. Walter and the old white horse has been on the job steadily, and whether this fact has kept the cows in their places or, whether business for him has been good, we don't know; but we are sure that citizens of the town trying to beautify their premises say thank you to the Council and Walter.

N. L. Atwood of Jaffray, B.C. was in Raymond on business the first part of the week, being on the streets Monday forenoon.

Arthur Taylor, furniture man of Provo, Utah and brother in law of A. H. Zabriskie and P. R. Taylor is visiting here for a few days with his family.

Ray Bascom, Clark, Harry and Urshel Lund, Bob Stewart and others from Raymond attended the Claresholm Stampede on Wednesday. A good crowd was present and they must have had some good stock for all the saddle riders but three and all the steer riders were either bucked off or disqualified by the judges.

Miss Elma Adams to most Raymond people, now Mrs. Jack Brady, was the guest of honor at a post nuptial shower in the 2nd Ward Tuesday night when her many girl friends here organized to show their appreciation of her friendship in this shower. A lovely lot of gifts was received by the young couple. They were married last week here in Raymond and will return soon to make their home in Salt Lake City where the groom is engaged in the Transport business. We join with Elma's many friends in wishing them a happy and prosperous future.

The War And Wheat

Recent German advances in Norway, Denmark, the Netherlands and Belgium have severed normal trade relationships between those countries and the outside world. Wheat exporting countries like Canada have lost markets; the people of those countries, being dependent upon imports of wheat and flour to provide them with an important part of their daily bread, face privation and perhaps worse so long as the occupation lasts.

The extent of the dependence upon imports of wheat and flour during the crop year 1938-39 was as follows: Belgium 63 per cent, the Netherlands 7 per cent, Denmark 23 per cent and Norway 75 per cent. In Belgium and Holland it is reported that the invasion has caused large scale destruction of the standing crop thus increasing the immediate dependence upon imports and in all countries within the German system, agricultural production is likely to decline from this time forward.

To some extent hardship can be mitigated by the substitution of inferior foodstuffs for wheat bread and flour. But so far as can be ascertained,

other foodstuffs are in short supply also. Germany will have no surplus to offer. Belgian needs may be reduced somewhat by the flow of refugees into France. Taking all these factors into account, however, there will be a grave shortage of food in the occupied countries.

In the last war, foodstuffs began to grow short in Belgium in November, 1914. At the first the British government refused to allow foodstuffs to go to Belgium on the grounds that they might find their way into Germany. Finally permission was granted for importation under supervision of the Spanish and United States embassies and there was organized the Commission for Relief of Belgium. The United States sent several shiploads of flour to Belgium under that scheme. After the United States entered the war, a Spanish-Dutch committee took over.

The need will be just as urgent in this war if the German occupation continues. It remains to be seen whether some neutral government will take up the task of furnishing or supervising relief.

Local Red Cross Tea Well Supported

"TOTAL" WAR

New and tragic meaning has been given to the phrase "total war" by the recent march of events.

Millions of Hollanders, their homes in ruins, their parents, friends and children dead, now know what "total" war means.

The citizens of Oslo, ground under the heel of a barbaric conqueror, know what "total" war means.

The heroic Belgians, their homeland overrun by the tanks and flying columns of an implacable foe, know what "total" war means.

Our own fighting men on land and sea and in the air—face to face with the monster of force the twisted mind of Hitler has created—they too know what "total" war means.

We wonder if Canadians living peacefully, and going about their accustomed tasks, appreciate the gravity of the hour—how filled with destiny are the days that lie immediately ahead?

This is indeed a "total" war. It is a war of whole peoples; and to wage it successfully it is imperative that the total resources of our nation be directed to what must be our one consuming purpose to win the war.

Today a means has been provided whereby everyone in Canada, regardless of his station, can do his bit to further this great crusade.

War Savings Certificates now being offered by the Dominion Government enable the masses of Canadians who are still fortunate enough to be living in the Dominion to make a direct and continuing contribution to Canada's war effort.

To buy War Savings Certificates is an investment in patriotism—an investment in our own security and freedom—an investment guaranteed by Canada herself.

It is our plain duty—yes, a privilege too—to buy War Savings Certificates.

We too can serve by saving.

Sunday School Conferences were held in the Tyrell's Lake and Warner branches on Sunday. Stake Superintendent Frank R. Taylor taking the delegates of the Stake Board to the Conferences, it was also Home Missionary Sunday, so the attendance had plenty of speakers last Sunday.

BIG BEND HIGHWAY OPEN- ING REVIEWED BY JACK PEACH

Opening ceremonies of the Big Bend Highway, 160 mile stretch from Revelstoke to Golden, B.C., will be reviewed by Jack Peach, CBC commentator speaking from Revelstoke, on Saturday, June 9th at 7:00 p.m. CST (6:00 p.m. MST).

Mr. Peach will travel over the highway on a special permit the day before it opens. He will spend the night in Golden, and on Saturday morning will return to the half way point, to a boat encampment on the Canoe River, where the Canoe joins the Columbia, to witness the ceremonies taking place at noon.

During the broadcast he will also give his impression of the roadway.

The highway is the last link in the trans-Canada highway west of the Great Lakes. Some of British Columbia's most magnificent scenery is found along this road which follows the Columbia River.

The Red Cross tea held Wednesday on the lawn of Dr. and Mrs. Madill and sponsored by the Red Cross of which Mrs. Madill is Chairman, was very successful and well attended, the organization realizing about \$120.00 out of the afternoon.

Mrs. Madill has asked us on behalf of the ladies of the Red Cross, to express their appreciation to all who attended and to all persons and stores who donated in any way to make the tea the fine success that it was.

W. I. MEETING

The W. I. held their regular meeting on Thursday, June 13th at the home of Mrs. Jas. Fisher with Pres. Mrs. Frank Leavitt in the chair with 15 ladies present. O Canada was sung and the creed repeated. The minutes of the last meeting were then read and accepted, business discussed and roll called.

A paper was given on Canadianization by Mrs. C. Tollestrup and a story told by Mrs. S. Smith.

4th lesson on How to Buy "The Costs the Consumer Carries" was given by Mrs. Wm. Parig and Mrs. Bert Kirkham. Plans were made for a quilt to be made and donated to the Red Cross, and arrangements were made to attend the conference at Milk River on June 28th.

Lunch was served by the hostess Mrs. Jas. Fisher.

The door prize donated by Mrs. Wm. Lamb was won by Mrs. Palmer.

The next meeting will be held at the home of Mrs. C. Rolfson on September 12th.

REGISTERING YOUTH FOR AIR MECHANICS

Registration of 200 trainees for aircraft building is now proceeding in Edmonton and Calgary. Operating under the Youth Training Scheme, this effort to supply ground men and mechanics is part of Canada's air war effort. Students will receive 600 hours of instruction, with free tools and free tuition. Age limit is 18 to 30—a limited number of older men being eligible.

NEW BOOKS AT LIBRARY

"Stones for Bread," "Big Fun Book," "Eney Britannica," "Newberry book for year 1930," "Rebecca," "Brother Heres A Man," "Whispering Cup," "Dark Stranger," "British Empire," "Twin Kids," "Bear Twins," "Leagras Boots," "Gunsake Range," "When Whippoorwill," "Something Special," "Quickly My Captain Waits," "My Son My Son," "I Found no Peace," "Great Gepp," "Whistle for Good Fortune."

The following books are on order and will arrive as soon as published.

"Eveless Eden," "My Horse and Baggy Daze," "Tamarack," "Faru the House Dog," "Hawkins New book," "Hawkins Nest," "Murder Take Home moon," "Whiteoak Heritage."

NON FICTION

"Civilization in Europe," "Modern Times and the Living Past," "Essentials in Economics," "Healthy Bodies," "Everyday Problems in Health," "Everyday Life in Prehistoric Times," "Reader in Canadian Civics," "Modern Chemistry," "Toys Worn Scrap Book."

CARRY ON

The necessity for the carrying on of our ordinary business was never more urgent than at the present time. Too often there is a tendency on the part of the public to tighten the purse strings unnecessarily and as a consequence business generally is injured.

Today, as never before we must "Carry On." The demands on our purses for Red Cross and War Services of all kinds, mean that we must guard carefully against any falling off of business the only sources from which we can hope to draw to meet these very necessary demands.

Don't get panicky, there are no doubt dark days ahead, but we will eventually win through. Carry On.

THE WAR AND YOUR ALIEN NEIGHBOR

Up to the declaration of war many citizens of Canada lived beside a German neighbor and found no reason to quarrel. They probably exchanged greetings and labor and were ever on the best of terms.

War is declared. Has this changed the nature of your neighbor? Does the mere fact that a madman who chances to be head of the German nation has declared war mean that every German throughout the world has gone equally mad and is ready to jump at his neighbor's throat.

Most emphatically no, and we should see to it that our treatment of these neighbors in no manner is affected, provided always that the alien continues to carry on as a friend and neighbor should.

Italy has now joined the enemy and we should certainly accord our Italian neighbors the same treatment we have in the past.

Do not let it be said of Canadians that they too have lost their sense of fair play.

This does not mean that we must not be on our guard, for the history of the present war has proven that there are German enemies within Canada. Germans who would not stop at anything to help the cause of Hitler. These are the Germans who cause trouble and if you know such as these it is your duty to immediately report to

the police.
But with your good alien neighbor carry on as in the past and we believe that such treatment will go far to show the world what British democracy really means.

EXAMINATION TIME

This is the time of year generally dreaded by school students—the time for examination of the knowledge and information they have acquired during the term just concluding. To some students a final examination is just another minor event, but to others it is a trial and a torment, something to be dreaded and dreamed about. The tendency in Alberta is away from term end tests and towards periodical examinations throughout the term, and this system seems to be more equitable all round.

It is a known fact that the nervous strain induced by final examinations towards which teachers and pupils have been working all year is harmful to some students. The unaccustomed funeral quiet in which they attempt to write down their knowledge, the last minute cramming and worrying are not the best conditions under which to work. And, too, some examiners seem to take pride in picking out obscure topics on which to question the students.

However, for better or worse exam time is here again for the hundreds of pupils in the E.L.D. and The Bulletin wishes success to each and every one of them. —Brooks Bulletin.

SEARLE PRECIPITATION REPORT

A decided improvement has taken place in the moisture condition during the week for the three Prairie Provinces as compared with the condition a week ago. Adding together the rains which occurred last fall during the months of August, September and October, and the precipitation which has occurred from April 1st to June 3rd, inclusive the moisture available to the growing crop is now 75 p.c. of normal, as compared with 71 p.c. only at this time last week and 95 p.c. at this time a year ago.

For Alberta the total moisture condition is now 92 p.c. of normal, as compared with 90 p.c. last week, and 90 p.c. at this time a year ago.

For Saskatchewan the condition is now 61 p.c. of normal, as compared with 57 p.c. last week, and 104 p.c. at this time a year ago.

For Manitoba the condition is now 87 p.c. of normal, as compared with 86 p.c. last week, and 65 p.c. at this time a year ago.

Northern and central Saskatchewan, with a narrow corridor

Ploughed and Ploughless Fallow

Recently inquiries have been received at the Lethbridge Experimental Station asking about the results obtained by the use of the mouldboard plough and the oneway disc. As far as crop yields are concerned, there is very little difference. If anything, the advantage is slightly with the one way disc.

As there is practically no difference in yield results, the question becomes primarily, which implement is more satisfactory for controlling soil drifting. If there is a good combine

or running from Elbow to as far south as Gravelbourg, badly needs rain. The whole of Saskatchewan lacks normal moisture, with the exception of a narrow strip in the south, tending towards the West, which is the district that for years has been known as the "bad drought area." Northwestern Manitoba lacks moisture and large parts of eastern Alberta are also somewhat deficient.

Those areas which need moisture badly must receive plentiful rains very soon if the growing crop is not to be seriously damaged.

THE LOUD SPEAKER NUISANCE

Consideration for other people is the essence of good citizenship and neighbourly courtesy. There are, unfortunately a few listeners in almost every residential district, who thoughtlessly turn their radio loud speakers on in full volume when windows and doors are open, forcing their neighbours to be an unwilling audience. In Great Britain, this nuisance is dealt with by municipal legislation. There would be no need for such special regulations, if listeners would make a point of controlling radio volume so that programmes could not under any circumstances be heard beyond the immediate confines of the home.

On warm evenings, it is understandable that listeners should wish to enjoy radio entertainment while sitting on their verandahs, or in their gardens. It should be clearly realized, however, that their private pleasure may quite easily become a public nuisance. In summer listening, to the Golden Rule is an excellent precept to keep in mind.

Mr. and Mrs. John O'Brien and family of Layton, Utah are visiting with friends and relatives in Raymond.

The A. G. H. and L. Club was held this week at Mrs. L. L. Harker's. Assistant hostess was Mrs. Velva Cooper. Mrs. Olive Fisher reviewed the book "Three's A Crew" by Katherine Perkinson. Pida's mode was served for refreshments. All present had a very enjoyable afternoon.

stubble present, the oneway disc can be used quite effectively if properly operated. It should be so operated as to kill weeds and leave as much of the trash and stubble on the surface as possible. This usually means running it shallow, as the shallower the cultivation the more trash will be left on the surface. There is no advantage that we can find for cultivating deeper than is necessary to kill the weeds. Frequently, three inches is deep enough, although in a heavy stubble it may be necessary to go deeper.

Special care must be taken if two or three additional onewayings are required during the summer fallow season. Quite frequently a heavy combine stubble is covered so completely before the end of the year that soil drifts seriously. For this reason, many successful wheat farmers use the one way for the first operation and then if possible, use the rod weeder, or the ordinary stiff tooth cultivator. A number of farmers have discarded the one way and are using the Noble blade or the 42 inch duckfoot cultivator made from an old engine gang as these implements when prop-

erly operated kill the weeds and leave the stubble and other trash on the surface to protect the soil.

If a field has been burned, or for other reasons has no stubble to leave as a trash cover, undoubtedly, the mouldboard plough is a better implement to use than the oneway disc as it turns up more lumps. Some farmers use the mouldboard plough on one wayed land if they have covered the stubble during the season as they are afraid the soil will drift. In this case, the mouldboard plough is used merely to turn the loose soil under and to throw lumps on the surface. Usually this is done in the latter part of July and is the last summer fallowing operation. In this case, the ploughing must be two or three inches deeper than the one way had penetrated.

Regarding the effect of depth of tillage on crop production, all evidence indicates that on most Alberta soils there is no advantage in deep tillage except when it is necessary to plough deeply enough for the purpose of turning up lumps as stated above. In summer fallowing, it seems to be merely a matter of going deep enough to kill the weeds and leave all the trash possible on the surface. On the Station there are fields that have not been cultivated deeper than 4 inches for 13 years and they are some of the best producing fields on the Station.

Public Notice

RESOLUTION OF TOWN COUNCIL JUNE 10th, 1940

Moved by Councillor MacPherson that "Whereas the Board of Public Utility Commissioners by order dated May 31st, 1940 in altering the Mill rate on certain areas also stated 'The Town cannot discriminate between the various residents in irrigation water rates charged,' and whereas certain residents have been charged at the rate of \$2.00 per acre and whereas it is advisable to set this rate uniformly at \$2.00 throughout the Town. Therefore be it resolved that the sum of \$2.00 per acre for the use of irrigation water be charged for all land in the Town of Raymond owned or used by any person which is North of the Main Canal.

And that the Secretary publish this notice in the Raymond paper listing the Blocks in which an alteration in water rates are made necessary and this shall be sufficient notice without the sending of separate notices and that the Secretary send tax notices to all persons affected by Board's order, altering mill rate and charge the sum of \$2.00 per acre for irrigation water in that area.

Irrigation rates in following lands have been raised to \$2.00 per acre making a change in tax notices received of .50 per acre.

Also all lands in Plan 44891 under the ditch and affected by Public Utility Order No. 8950 have been raised to \$2.00 per acre as per new tax notice.

Resolution carried unanimously

PERCY W. COPE

Mayor

W. L. JONES

Sec. Treas.

Miss Lura Redd who is on the teaching staff at the college in Brigham City, Utah, is spending a portion of her summer vacation with relatives here in Raymond.

The Town placed a number of culverts in the street in front of the Raymond Service Centre on Tuesday to drain this portion of the street and keep the driveway of this business house dry and usable at all times.

Greeting Cards for every day and every occasion. New stock just arrived. See them at the Recorder Office today.

DEFIANT

defiance?

One day Booker T. Washington the noted Negro educator and builder of the famous Tuskegee Institute, was walking with a white friend when another white man came along and rudely jostled the colored man into the gutter.

"Mr. Washington, how do you stand it?" the friend cried indignantly. "Have you no spirit of

"Yes, indeed," replied Washington. "I defy any man to make me hate him."

Wm. W. Wilde has purchased the lot between the Knight Sugar Co. Office and the Bank of Montreal and has gravel on the site in preparation for the commencement of construction on a new home. No details are available yet.

BEAT
Rising Food Costs
with an **ELECTRIC**
REFRIGERATOR

You Can
Save
Two ways

This year, for foods alone, you will spend some \$500 or more.* How much of this food will be wasted because you can't keep it until used? How much could be bought at special prices if you had somewhere to keep it? How much will spoil and have to be thrown away? A 1940 Electric Refrigerator will help to keep your food costs down in seven different ways.

- 1 Quality buying . . . larger sizes mean better prices.
- 2 Spoilage can be eliminated.
- 3 Food bargains can be stored until needed.
- 4 Expensive last-minute shopping reduced.
- 5 Left-overs made into appetizing dishes.
- 6 Prepared foods made up in quantity.
- 7 Desserts made at home at lower cost.

* According to Statistics, the average family with an annual income of \$2,000 will spend \$612 of it on food.

More than Ever this Year You Need
the Food-Saving Features of an

ELECTRIC REFRIGERATOR

IT PAYS FOR ITSELF - THEN PAYS YOU

help
your studies!

A New Valuable TOOL IN EDUCATION

Recent tests, conducted by prominent educators, have shown parents, educators, and students that the portable typewriter is a most valuable educational tool. In a dramatic two years series of tests they have proven that most children improve grades as much as 14% when using a portable typewriter.

An unexpected outcome was that, in addition to betterment in Composition, Geography, History, Science and even Arithmetic, self expression became easier even for shy students!

You, too, can have this marvelous educational aid—for Remington Rand makes it easy to get! Only a small deposit, and terms as low as 10¢ a day, will bring you the Remette Portable, other models a trifle higher. Read what prominent educators say about student use of typewriters. Send for Free Booklet.

FREE!

32-PAGE
TOUCH METHOD
INSTRUCTION BOOK
